NOTES: Dollar amounts shown are in current dollars. The data reflect preliminary annual estimates of the resident population for the United States, as of July 1, 2010 excluding the Armed Forces overseas. See [Appendix II, Gross domestic product \(GDP\); Health expenditures, national](#). Percents are calculated using unrounded data. Estimates may not add to totals because of rounding. Starting with *Health, United States, 2010*, estimates are based on a revised methodology that incorporates available source data and various methodological and definitional changes. These revisions are due to a comprehensive change in the classification structure of how estimates are defined and presented. For more information on the impact of these revisions, see: <http://www.cms.gov/NationalHealthExpendData/downloads/benchmark2009.pdf>. Data have been revised and differ from previous editions of *Health, United States*.
